

LuxProvide S.A.

Avis de marché

Procédure : européenne concurrentielle avec négociation

Type de marché : Fournitures

Ouverture le 26/02/2020 à 23:59. **Lieu d'ouverture:** The opening sessions are not public.

Intitulé : LxP-2019-01-MeluXina

Description : Acquisition, Delivery, Installation and Maintenance of a Petascale Supercomputer

The target performance for the Supercomputer is of at least 10 Petaflops, supported by a high performance data infrastructure enabling world-class HPC, HPDA and AI services.

The proposed supercomputing system will serve a large variety of complex, data-driven computational workloads. Its design is forward-looking, responding to the emerging convergence of simulation, modelling, data analytics and AI, and enabling simulation driven by predictive analytics.

Modalités visite des lieux/réunion d'information : During the first phase of the procurement a site visit or meeting is not foreseen.

During the second phase of the procurement and before the submission of the initial proposals by the Tenderers, the Contracting Authority will organize 1 (one) mandatory site visit and 1 (one) mandatory information meeting with all of the Tenderers at the same time and same date on both campuses in Bissen and Bettembourg.

Conditions d'obtention du dossier de soumission : The procurement documents are available for unrestricted and full direct access, free of charge, at: www.pmp.lu

Additional information can be obtained from the above mentioned address.

Réception des offres : Requests to participate or proposals must be submitted to the above mentioned address.
