**Intitulé :** PNE 24AB03 - Development of corporate uni.lu website - SYDE

**Description :** The University of Luxembourg has developed a new website, 'uni.lu,' which was launched in July 2023. The University plans to improve the website "uni.lu" and would like to redefine its long-term needs. In the meantime, a one-year prestation is required to ensure maintenance and the continuous improvement of its recently launched website "uni.lu" until the definition of the new requirement from the SIU. To ensure the smooth continuation of services during this transition phase, it's essential that the University works with the supplier SYDE, the current service provider. The previous tender 190009 - Uni.lu Web Relaunch was initially won by the company ARHS (with Syde as a subcontractor for the development part). The University decided to implement 2 separate services contracts: (i) one with ARHS for Hosting and Maintenance and (ii) one with Syde for the development according the previous context.
