Intitulé : Supply of a mass spectrometry analyzer for newborn screening and services of related maintenance

Description :

The LNS wants:

- To acquire a combined HPLC and mass spectrometer (LC-MS/MS) for newborn screening analysis. The instrument will be used for the quantitative analysis of amino acids, acylcarnitines, and other metabolites in dried blood spot (DBS) samples for early detection of metabolic disorders
- And to purchase maintenance services for a minimum of four (4) years after one (1) year of warranty

The successful Tenderer shall ensure the due and proper execution and coordination of the acquisition of the material and the services of maintenance, on behalf of the LNS. The supply and Services shall be performed by the successful Tenderer's staff, whose competence, courtesy and presentation shall be irreproachable.

The details of the acquisition and maintenance are described in Article 8.
